

*call before you dig!
call before you dig!
call before you dig!*

DigNORTH has pioneered Ontario's first true call before you dig program. A dedicated service for Contractors and Homeowners and anyone contemplating digging, to place a utility locate request via a single point of contact.

The shovel stops here! 

Education, Public Safety and Awareness is paramount.

- ① **Health and Safety of People**
- ② **Damage Prevention of Buried Infrastructure** = 
- ③ **Environmental Protection**

How do we make this formula work?

1-888ONT-CBYD

Through the unique program specific number with the emphasis on making one call and one call only. Changing a mind set and creating a habit, and making CBYD a household name. You have one responsibility and that's to make the call... You make the call, we do the rest!

ONE CALL ONE RESPONSIBILITY™

In conjunction with the CBYD web site we have designed an all encompassing program catering to contractors with emergency preparedness contacts and resource library.

cbyd.ca

This program is designed to eliminate the stress to the Contractor and Homeowner in removing the uncertainty of not knowing if all the utilities have been notified.

It is our intention to have the contractors as members of the CBYD program and to offer efficiencies and voice in an industry very much controlled by the major utilities.

Northern Ontario will be recognized as the field leader in damage prevention creating the model to be expanded to the rest of the province and eventually, Nationally.

 = **public safety and awareness**

 = **a safer Ontario for everyone**

The definition of a one call system is a number or speed dial where the excavating community can place one call and have all utilities notified of their intent to dig. DigNORTH with its CBYD program will make that accessible with a single point of contact, easing the process, protecting the buried infrastructure and bringing our workers home safe.

 Is the future of damage prevention

think safe - dig safe - be safe

Damage Prevention is a Shared Responsibility!
